ABBOTSFORD TO CELEBRATE CORONATION WITH SPORTS

An excellent program of outdoor events will be the contribution made by Abbotsford and the local school district to the Coronation Day celebration. A list of upwards of forty numbers of field sports will be held on the athletic grounds in Jubilee Park on Wednesday of next week. This will include foot races and events of a novelty character. There will be folk dancing, singing and brief speeches. Probably the main attraction for the adults will be the senior football game when local stars will battle for honors with the well-known Twigg Island Dairy team. The visiting players are known to be a strong, fast team, and an unusually interesting game is assured.

This affair has the endorsement of the Board of Trade, Ratepayers' Association, Town Commissioner and Board of Education. Everybody is invited to the grounds to see this program on Wednesday next. There will be no charge for admission. In the evening there will be a dance in the Community hall, Matsqui. The proceeds from this dance will go to the British Columbia Cancer fund.

Guests at the home of Mr. and Mrs. J. W. Plowright last week were their son-in-law and daughter, Mr. and Mrs. A. Lennox of Vancouver. Mr. and Mrs. Lennox left at the week-end on a visit with relatives in England. They sail on the "Duchess of Bedford".

Six tables of whist were played at the card party held by the Catholic Women's League in the Parish hall last Friday evening.

Prize winners were: Ladies 1st. Mrs. Rochon, Gents 1st. Mr. G. A. McKay; ladies, consolation, Mrs. Plowright; men's, Mr. Rochon.

CHILLIWACK MAN RECEIVES CONSERVATIVE NOMINATION

A former business man of Abbotsford was the unanimous choice of the Conservatives at their nomination convention, held here in the Masonic hall, last Friday evening. Leslie Harvey Evers was the only name presented for consideration. Mr. Evers is now a resident of Chilliwack, where during the past few years he has headed the polls for alderman in the civic elections.

Although a comparatively young man, Mr. Evers was in business in Abbotsford on Essex avenue on part of the property now occupied by the Atangard hotel, long before this hostelry was erected.

The meeting on Friday evening was attended by Conservatives from every section of the Chilliwack riding, over 200 being in attendance.

During the meeting short addresses were given by Sam Carson, H. J. Barber, M. P., Stuart Davidson and Mrs. J. Allen. Mr. Evers in accepting the nomination, thanked the convention for the confidence reposed in him and added that he thought the party stood an excellent chance of winning.

Matsqui Baptist Ladies' Aid will meet at the home of Mrs. C. Sward on Wednesday, May 12, at 2 o'clock.

Happenings in Abbotsford and Sumas Districts

Mr. E. A. Barrett was a visitor at Bowen Island over the week-end.

Next Wednesday-- Coronation Day will be a general holiday in Abbotsford, when all local stores will be closed.

Interior of the J. Lawrence dry goods store has been lengthened, and the stock displayed to better advantage.

Mr. and Mrs. Merritt have taken up residence in the house at the C.P. station, formerly occupied by Mr. and Mrs. M. M. Shore.

Mr. and Mrs. Caldecott and son Randolph left on Saturday for a visit in England. They sail on the "Duchess of Bedford", from Montreal.

Donations to the M.-S.-A. Welfare Fund have been gratefully received from the following: Mesdames D. Benedict, Pringle, Mouldley, Duark, Newcomb, Moses and Turner.

Miss Marion Miles, School Nurse, spent Saturday in Victoria conferring with Dr. Young, Provincial Health Officer, on matters pertaining to the health work in the M.-S.-A. area.

Mr. and Mrs. W. Pottage have returned from their honeymoon trip, which took them as far south as San Francisco and they have taken up residence in a suite of rooms upstairs in the new post office building.

His many friends in the district will be glad to welcome back Ray Weir, who will be employed at the Huntingdon customs during the summer months. At the present time Mr. E. Leary is away on his vacation.

Mr. A. McDonald local shoe-repairer, has moved into his own premises, formerly the Oyster Bay Cafe, immediately next to his former location. The building has been renovated, and now presents a roomy, bright interior.

An enjoyable whist drive was held by the ladies of the O. E. S. Wednesday evening at the home of Mrs. W. Roberts. Prizes went to Mrs. G. Preston and Mr. Fred Finlay. Consolations were awarded to Mrs. G. Reith and Mr. D. Stein.

Advertisers Please Note

Advertisers and correspondents will please note that The News will be published next week on Tuesday May 11, as the regular publication day, Wednesday is a holiday.

Copy for Advertisements and news for publication must reach us either Saturday or early Monday morning.

Mrs. E. A. Hunt and Miss Vera Hunt were visiting in Vancouver during the week-end.

Mrs. H. Grimley has received word of the death of her mother in England.

Mrs. R. Forrest underwent an operation in the Chilliwack hospital on Monday.

Mrs. T. C. Bailey is staying at the home of her daughter and son-in-law Mr. and Mrs. R. Forrest of Chilliwack.

Visitors at the home of Mrs. and Mrs. H. Thomas over the week-end were Mr. and Mrs. L. Stady and baby of Chilliwack, Mr. and Mrs. J. McDonald and family and the Misses Annie McLean and Norma Crawford all of Vancouver.

Members of the Abbotsford Anglican Young People's Association and friends presented Miss Frances Harvey and Tommy Irvine with a purse and sum of money, at a party held in their honor last Wednesday evening in the parish hall.

Mrs. Kidd from Edinburgh, Scotland (who has been on a visit with her sister, Mrs. Mutter in the Poplar district) left last night in the return trip to the "land o' cakes and scones". Mrs. Kidd only recently arrived here from a trip across the Pacific, where she visited her son in New Zealand.

HEALTH UNIT PREVENTS SCARLET FEVER OUTBREAK

Owing to the prompt action of Miss Arnold, Public Health Nurse, in placing the Hirschman family under quarantine last Saturday, it is believed that a possible epidemic of scarlet fever has been avoided.

All absentees at the North Poplar school were immediately checked and children with sore throats excluded from school. Swabs have been taken from suspicious cases and the children kept in temporary quarantine until the results are known.

With the cooperation of parents and children, it is hoped that no further outbreak will occur.

Preparations are being made for the summer season at the civic swimming pool. This week the Commissioners are advertising for an attendant to act as manager during the 1937 season.

Season

KILGARD GIRL WILL BE QUEEN OF MAY DAY FETE

A great and pleasant surprise is in store for those who plan attending the Empire Day celebration in Abbotsford. Those in charge of arrangements for the 24th of May have engaged a stellar attraction--something different from anything ever before presented in this selection of the province--but so far it remains a mystery and The News representative has solemnly promised to not divulge any information given him regarding this outstanding event for May Day celebration at Abbotsford. In addition there will be a program of around thirty items, including two softball games. Of course there will be the usual May Queen crowning ceremony and the May Pole dancing. The oratorical contest has a few aspirants--just enough to make the contest interesting. It is expected that about five or six will take part in this portion of the program. These young orators will be heard shortly before or immediately following the crowning ceremony.

Maxine Kenney of Whatcom Road school has been chosen as the May Queen. The selection was made by draw at the Elks' dance in the Orange hall last Friday evening. Jean Weir of Abbotsford will be Miss Canada, and Leona Walkerton of Peardonville will be princess. Others honored by their school mates in selecting them as candidates for May Queen were: Helen Duncan, Jubilee school; Nellie Coghlan, Mt. Lehman school; Molly Hill-Tout, Highland school; Hazel Reid, Gifford school; Evelyn McDonald, Kilgard school and Norah Tessaro, Huntingdon school.

Clean-Up Day Called for Abbotsford

Abbotsford is to be in its best attire for Coronation Day. By order of the Commissioners, Monday next will be Clean-up day in town. Tenants and property owners are notified to do all possible to make Abbotsford clean and attractive. All unsanitary conditions must be cleaned up and garbage and unsightly material must be destroyed or placed in a convenient place to be taken away by trucks engaged for that purpose on May 10th.

Breadmaking Success

Our Success hinges on our good bread and the loyalty of our residents in buying a home product--thus helping us to build up a bigger payroll. We have aimed, studied and striven for years for perfection in the bakers' art. Judging from the steady increase in the number of regular and exclusive customers, our efforts have not been in vain.

While the past is secure, present popularity gives us a mortgage on the future, and public spirited citizens who are lovers of fine bread, pastry and cakes should not fail to be regular users of the products of this bakery. If our bread is not at your grocery, get it from the bakery or from the driver.

WORLD HAPPENINGS BRIEFLY TOLD

Members of the royal commission inquiring into Canadian penal conditions announced there would be no more public hearings.

Lethbridge will have a new 700-acre airport ready for inauguration of the trans-Canada air mail some time this summer.

In its first four months of operations, 5,441 loans aggregating \$2,091,158 have been made to property owners under the home improvement plan.

C. L. Coggon, railway mail clerk, Moose Jaw, obtained 100 per cent. in a sortation examination held by the post office Feb. 26, it was announced in the post office weekly bulletin.

President Roosevelt intimated he intends to appoint Mrs. J. Borden Harriman, New York and Washington society woman, United States minister to Norway.

Winnipeg city council has voted \$1,960 for coronation celebration expenses. Half the amount will be devoted to four pageants representing various sections of the British empire.

Dr. Halbert L. Dunn of the United States census bureau told the conference of state health officers that one-third of all persons killed in automobile accidents are tourists far from home.

Increasing revenues to the railways from the expanding Canadian mining industry would bring constant reduction in annual railway deficits, Hon. Eugene Paquette (Cons.-Laurel) predicted in the senate.

Was Made Welcome

Governor-General Has Warm Friends In United States

When John Buchan was here in 1934 speaking at the opening of the great new library of Columbia University, he was welcomed in his own person and for his varied contributions, in both the written and spoken word, and especially to the English-speaking youth of the world. He has returned in an official capacity with a title which it is difficult for others than Scots to frame or pronounce right.

The Scots have a word for the most cordial hospitality that can be shown a guest. It is a welcome into the "ben"—that is, into the best room of the house. The President in bidding this distinguished visitor to come "ben the White House" has shown him the most cordial welcome that the people of the United States can offer a visitor engaged in what he has himself called the "noble merchandising of civilization."—New York Times.

Japan Buying Iron

Has Purchased Construction Machinery Used At Boulder Dam

Japan, urgently needing steel in her military and industrial expansion, is buying construction machinery used in building Boulder dam. The Naissea Court, chartered steamer, took 450 tons of machinery from Los Angeles harbor, bound for Yokohama and the steamer City of Los Angeles started for the Osaka junkyards carrying 6,000 tons of scrap iron.

Giving Dobbin The Air

Harry C. Kirby of Sunbury, Ohio, has patented a pneumatic horse collar which is intended to eliminate sore shoulders. It is inflated through a regular automobile valve. If this invention works out we suppose that filling stations will have to provide stalls so that when a horse and wagon customer stops by old Dobbin can have his peck of oats while he is being serviced with air and water.

London is preparing to install streamlined trains in its subways.

Crack Revolver Shot

Canadian Gives Demonstration For United States Army

Sergeant Robert "Bob" Pickrell, of the Canadian National Railways police at Winnipeg, world's champion revolver shot and holder of practically all Canadian revolver and pistol championships, gave the United States army a lesson in marksmanship at Fort Wadsworth.

Using Bud Donahue of the Pathe news reel as a target, Sergeant Pickrell outlined him and his camera with 15 shots while Donahue worked the camera so that theatre audiences all the world over will be able to know what it feels like to be shot at. His colleague, cameraman Larry O'Reilly, also of the Pathe News, worked a second camera to show that the human target practice was genuine.

The performance was witnessed by a squad of soldiers from the Eighteenth Battalion, United States infantry under the command of Lieutenant McGehee and when the various exhibitions were completed, Sergeant Pickrell was besieged for advice and autographs.

In addition to outlining the figure of Cameraman Donahue, Sergeant Pickrell also made a number of shots at the regulation revolver targets that are used by the American army. Although an extremely strong and chilly wind was blowing directly off New York's outer harbor, on the shore of which the range is located, Sergeant Pickrell complained that the bull's-eye was really too big and so, from a distance of 40 yards, he made his own bull's-eye by placing five shots around his first shot. He was so accurate that the entire group of shots could be covered with a 50-cent piece.

The United States army is saying this target to use as an example of the degree of accuracy which can be attained by a revolver shot.

Marking Ransom Money

New Discovery That Will Make A Bank Note Shine Under Invisible Rays

A light that reveals fingerprints never before visible, and a method of marking ransom money so a suspected bill will shine like a glow-worm, was revealed.

Both came from the Bell Telephone laboratories and were by-products of scientific research on metals used in telephoning, under direction of Dr. Francis F. Lucas, one of the world's foremost metallurgists.

Dr. Lucas discovered the method, which mineralizes the prints and makes them permanent, in contrast to present silver nitrate and iodine fuming methods which are "fugitive," tending to fade. The prints mineralize in the fumes of Fleming's re-agent, a chemical made of three acids, chromic, osmic and glacial acetic, a preparation used by biologists as a fat fixative.

The mineralized prints show as dark lines. Having made them indestructible as metal, Dr. Lucas turned to another department of metallurgy, which uses ultra-violet, or black light, to reveal metallic crystals not otherwise clear.

The surfaces carrying the indestructible prints were soaked with dyes invisible under light, but which fluoresce, that is shine like glow worms, under the invisible rays.

This makes the mineralized prints stand out like iron bars in a lighted window.

Canned Potatoes

Undersized potatoes, closely graded to uniform size, are being canned on the Virginia Eastern Shore. When opened, they carry the flavor of fresh young new potatoes, are especially good creamed, in salad, or browned with roast beef. Hotels like them for banquets—every guest's potato is just like his neighbor's.

The humpbacked camel has a spinal column as straight as that of any other animal.

ALL OUT TO WIN —News of the World.

Had To Abandon Idea

Late King George Unable To Launch Fund For Servants

The story of how the finance crisis of 1931 forced King George V. to give up plans for launching a building society for the benefit of his servants, has been told by Sir Ralph Harwood, the late monarch's financial secretary.

Sir Ralph described the projected scheme as "the building society of borrower's dreams." It was going to charge the borrowers only two per cent. on their mortgages, and it would have been willing to advance the full 100 per cent. of the cost of mortgaged property.

The plan had been evolved by the King after a discussion on the civil list. The King had pointed out that the financial position was so satisfactory that he would like to do something for the permanent benefit of the servants.

"He did not want to give wage increases because the wages were good and increases might not always be put to useful purposes," Sir Ralph said. "He wanted to do something which would help and encourage them to be thrifty and be of permanent advantage to them—he warmly welcomed the building society scheme."

However, the King asked for a \$250,000 cut in the civil list when the financial crisis came and so the scheme had to be dropped.

MANY-OCCASION FROCK DE- LIGHS TOT WHO ADORES PRETTY CLOTHES

By Anne Adams

All dressed up with oh—so many places to go, is the cunning youngster who wears Pattern 4301! She'll wear it to school (provided it's made of a sturdy tub cotton) and even to a party when stitched up in a dainty fabric! Mother knows the saucy touches that delight a small girl's heart, and any tot will dote on puffed or flared sleeves, a "classic" Peter Pan collar, dainty ruffles and a skirt that flares out gracefully above chubby knees! And all this perfection is easy as can be to cut and stitch, for the clearest of detailed directions are included. For fabric—why not dotted swiss, percale or dimity for "everyday"—and a crisp taffeta for parties?

Pattern 4301 is available in sizes 2, 4, 6, 8 and 10. Size 6 takes 2 1/4 yards 36 inch fabric and 1 yard lace. Illustrated step-by-step sewing instructions included.

Send twenty cents (20c) in coin or stamps (coin preferred) for this Anne Adams pattern. Write plainly: Size, Name, Address and Style Number, and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

Difficulties To Overcome

Pioneer Film Producer Gives His Opinion About Television

Television, says Film Producer Jesse Lasky, may be just around the corner, but there's a long road to be travelled before anyone gets to it.

The pioneer movie-maker listed three major difficulties.

1—The gregarious instinct that sends people to theatres.

2—The unsuitability of radio stars for filming.

3—The nerve-strain that would be necessitated by heavy concentration on a comparatively small screen.

"Understand, I'm convinced television is coming," the producer said, "but it won't come soon enough for any of us to worry about."

He said he believed the technical frailties that now beset television will be corrected.

"But I don't believe people will choose to stay home, by themselves, for a television broadcast, rather than go to a theatre to see a movie. To many, the sensation of being in a crowd, with lights and life around, is very important."

"As for talent, we're having trouble finding, in radio, people who are suitable for pictures. Radio and the movies are two totally different fields. Generally their stars are not interchangeable."

Lasky said television in its present form would be too much of a strain on the tired business man at night.

"After all, you can read or walk around or relax while merely listening. But it would require a genuine effort for a man to sit with his eyes glued on a screen hardly bigger than the average window."

Lasky said he believed television might first develop in the field of news-reporting.

"Assuming that the technical aspects can be straightened out, television would occupy an important function by transmitting pictures of news events directly from the scene. But all that is still a long, long distance away."

Estimated By James Watt

Inventor Worked Out The Formula For Horse Power

In James Watt's scrapbook, which is now in the Birmingham Reference Library, appears under the date of February, 1782, his detailed computation of horse power, based upon the experiences of Wrigley, his millwright. At that time horses were employed to drive mill machinery, and Watt estimated that the average cart horse developed 22,000 foot pounds of work per minute. Anxious to give good value to the purchasers of his steam engine, Watt, in using the term "horse power," increased his estimate by 50 per cent. and thus it came about that the 33,000 foot pounds per minute formula was evolved.—Industrial Britain.

Walter Was Insulted

An English lady, just off the boat, was taken by her hostess to the Park Lane for her first American luncheon. Being very much interested in the American way of living, the Englishwoman ordered a typical Yankee luncheon of fried chicken and a mint julep. Then, for desert, she settled on ice cream. "But none of your great gobs, waiter," she admonished. The fellow stiffened with indignation. "Madam," he said, "the Park Lane is noted for its small portions."—New Yorker.

Trying New Method

California orchardists are trying out a new method of "defrosting" their orchards. When the thermometer drops to freezing they turn on giant electric fans with airplane-type propellers, which are mounted on 40-foot towers in the centre of their orchards. A push of a button turns on the fan, which literally blows the cold air away, mixing it with the warmer current from above.

Habit Soon Grows

Although People Start Amateur Photography In Small Way

What's a minibus? It's a bug which bites you and makes you one more member of a vast army of minicamera (miniature or candid camera to you) enthusiasts.

The menace of the minibus is its subtlety. Minicameras are so small and comfortable in the palm of your hand, so quick to catch a picture when the subject isn't looking—and some may be had for a trifling sum. And they're good, too. So, you say you'll buy an inexpensive one, just for the fun of it. Of course, "you'll never get real serious about it."

But when the minibus bites, and the infection spreads through your bloodstream, you realize you should have one of the real, professional cameras, the kind that cost from \$110 up. They have fast lenses, lightning shutters, and, besides, if you're going to make a hobby of photography you owe it to yourself to do it right.

So you buy the more costly camera. And now the minibus has you for fair. You learn that to take pictures properly the exposures must always be right. Hence you need an exposure meter. Since it will save you from wasting film you regard this as an economy. Then you "just have to have" a telescopic lens, because many of the best "shots" must be taken from a distance, like birds, animals and good-looking blondes. And now you are well infected—and ready to discover that you haven't put a nick in the available assortment of gadgets, what with extra fast lenses, special view-finders . . .

Are you dismayed? Not at all. You immediately get out pencil and paper and begin to figure how . . . ? That's the worst of the minibus!—New York Post.

Condition Needs Correcting

Faulty Posture Becoming Very Marked In Young People

Public school pupils of London, Ontario, may be given special instructions in posture and carriage.

A recommendation that such training be afforded was made to the board of education by a woman member as a result of visits to the schools. The trustee observed that children leaned against their desks when asked to stand. She believes they can be taught to sit straight, to stand erect and to walk more gracefully.

If her proposal wins the sanction of the board, it is likely the director of physical education will be asked to correct this condition, beginning with the next school term.

The suggestion should be taken up by boards in other cities and towns of Ontario. Faulty posture is quite common and while some may argue instructions in this subject have nothing to do with education, there is no denying the fact it often causes physical ailments and the latter often retard progress of pupils.

Increasing use of the automobile and other modern luxuries tend toward development of a race of hollow-chested, round-shouldered people. To counteract this tendency instructions in correct posture and carriage during public school years, seems like the logical thing.—Sarnia Canadian Observer.

One Way To Move It

Maryland Man Used Dynamite To Get Car Out Of Mud

Impassable conditions of the roads near Thurston, Maryland, recently caused a resident to blow up his car with dynamite when it became stuck in the mud. The man was on his way home when his car stuck. Efforts of neighbors and a garage man to move it only caused it to sink deeper into the mire. Someone suggested dynamite. Mr. Gregg took a collection among his helpers, and bought several sticks of the explosive with the money. The blast moved the car all right. It landed beside the road—a mass of wreckage. The car was a 1926 model.

Retirement Age Fixed

Retirement ages for officers of the Royal Canadian Mounted Police have been fixed in amendments to rules and regulations of the force published in the Canada Gazette. Retiring age of the commissioner will be 62, his deputy 61 and all other officers 60. The fixing of the retirement ages is understood to be intended to speed up promotions within the force.

A young mother asked her butcher to weigh the baby.

"With pleasure, madam." Then having examined the scales: "Thirteen and a half pounds, with the bones."

Denmark has 3,326 miles of railways within its confines.

IF I COULD ONLY GET AN UNBROKEN NIGHT'S REST!

Up time and again because of kidney and bladder weakness? Need nature's warning! Your system may be clogged with poisonous wastes. Take GIN PILLS to soothe and tone up the kidneys—enjoy unbroken rest—see how much better you feel. "Prove their merit through their use!"

GIN PILLS FOR THE KIDNEYS

Gardening

Grass seed may be compared to good tobacco. The best seed is a mixture or blend of different grasses. A proportion of those much more expensive and slower germinating but permanent grasses will be mixed with a certain quantity of cheap, quick-growing seed. It is the former which form the fine-stemmed, deep green permanent turf which goes on improving with the years. A certain amount of the cheap, quick-growing kinds are needed to shelter and nurse along the others for the first summer, but sowing these alone is not sufficient for a permanent lawn. Hence, a well balanced, high quality mixture is recommended.

Grass makes its growth in cool weather; therefore, early sowing is advisable.

The ground should be allowed to settle after digging or plowing, and then levelled again. If there is time it is advisable to repeat this process several times. The top soil should then be raked fine and the grass sown at a liberal rate, once across and once lengthwise. This double sowing insures an even distribution. For obvious reasons seed is sown on a day when there is no wind. In covering, the gardener is advised to rake one way only and then firm the soil with a heavy roller or poulder.

The first actual gardening operations, if the ground is ready and free from surplus moisture, will be to plant those extra early flowers like sweet peas, cosmos, marigolds and other hardy annuals and almost any of the perennials. This is also the time, authorities advise, to get in grass seed. In the vegetable line, first sowings of lettuce, spinach, carrots, beets, and even potatoes, will be made.

At first, one is advised to make small sowings and so spread out the harvesting season. Then, if winter returns again after these first seedings are made, the loss will be trivial. Seed, after all, is the cheapest thing about gardening and one of the few factors over which the gardener has absolute control. On these counts alone, it is highly important that only the best seed from reliable Canadian sources should be used. Everything else is wasted; soil, fertilizer and labor if the foundation—seed—is not right.

A Western Story

Prize-Winning Book By Kathleen Redman Strange Deals With Farm Life

The prize-winning book, with the West in her eyes, which under the title "A Modern Pioneer," recently won for its author, Kathleen Redman Strange, the thousand dollars offered by George J. McLeod Limited of Toronto and the Dodge Publishing Company of New York, with the co-operation of the Canadian Authors' Association, is scheduled to appear on the market this month.

Mrs. Strange, is the wife of the internationally known grain expert, Major H. G. L. Strange and is already well-known to the reading public of Canada for her stories and articles which have, from time to time, appeared in our magazines and newspapers. Her book should be looked forward to with special interest, since it describes in an intimate and lively fashion, every-day life on a typical prairie farm. It tells particularly the story of the farm women, in whose struggles and triumphs, hopes and disappointments, Mrs. Strange herself shared for ten years. Her book is a fitting tribute to the splendid courage and endurance of the women of the farms, to whom it is dedicated.

One of the judges, Dr. Pelham Edgar, says of the book, that it is not only admirable as literature, and as a personal record, but that it should prove of practical value for intending settlers, since the conditions depicted, though actually set between the years 1920 and 1930, are much the same to-day and cover both boom and depression periods in prairie life.

It is interesting to note that out of the 174 manuscripts received in the competition, on many subjects and varied localities, that a story of Western Canadian prairie life should have been chosen. It can be said to be an indication of the interest taken in the West, in the people and their problems.

Dubhe, Merak, Phecca, Megrez, Alloth, Mizar, and Alkaid are the names of the seven stars of the Big Dipper.

Don't gamble with Weak Yeast!

BAKE WITH ROYAL
—always full strength

Each cake of Royal is protected by an air-tight wrapper

REALLY delicious bread demands an absolutely pure yeast—one that's full strength and pure. Otherwise, you run the risk of spoiled dough—heavy gray texture, a sourish taste and smell.

You can always be sure of Royal Yeast. Every cake comes sealed in an air-tight wrapper—secure against contamination, its full leavening power assured. And Royal is the only yeast that has this special protection.

7 out of 8 Canadian housewives today insist on Royal when they bake with a dry yeast. They know it is reliable. For fifty years Royal has stood for highest quality.

Be sure to ask for Royal when you buy dry yeast. Don't risk baking failure with weak inferior yeasts.

U.S. Air Base

To Set Aside 960 Acres Near Fairbanks, Alaska

President Roosevelt set aside 960 acres near Fairbanks as a prospective site for the United States army's proposed \$10,000,000 Alaskan air base.

An exclusive order prohibiting settlers from entering the area said the land was being "reserved for use of the war department for military purposes." Army sources, however, described the site as a possible location for the new base.

Beetles exist in every part of the world. There are 100,000 classified species, and new kinds are being discovered constantly.

THE YELLOW BRIAR

A Story of the Irish on the Canadian Countryside

By PATRICK SLATER

By arrangement with Thomas Allen, Publisher, Toronto.

CHAPTER III

Jack Trueman's dog was a black and tan collie with a bob-tail. His was the general purpose breed of a drover's tyke; and he was all dog. Jack claimed to own the sharp-eyed, self-reliant fellow—but that was a matter of opinion, merely. In the dog's way of looking at things, Rover owned Jack Trueman; and Trueman—he owned me. When a smart, clever dog has something of his very own, you understand, say a smelly bone or an unruly boy—naturally he thinks highly of his own property. And he puts up with the smell of his own bone and the kicks of his own boy as one of the inconveniences of proprietorship, just the same as you and I put up with taxes.

Rover liked, at times, to have his boy throw sticks for him; and, of course, sticks can not be thrown if they are not fetched. But he only fancied that sort of thing in moderation. When the sport ceased to amuse him, he would cock his leg against a post, and then run away on business of his own. This was clear evidence, you will agree, that Rover was the chief executive.

Jack Trueman had not bought the dog; nor had he been given the dog. One day, Rover had left the drover's team he was looking after, and had dropped in, casual-like, to inspect the alley at the side and the stable in the rear of the Tavern Tyrone. He fancied the look of the place and the smell of the slop bucket. Offhand, he decided he would like to own a boy who lived round an interesting place like that. So the two of them struck up a bargain on the spot—at least they thought they did. There was a mutual misunderstanding so complete that things worked out all right.

One June day, we were down to the foot of Berkeley Street to see a double hanging; and that surely was one glorious well-filled day. There was a high stone wall clear around the prison which stood close to the bay shore; and the Fair Grounds lay open to the west. Two men, Turney and Hamilton, were to be hanged on a Tuesday morning. To give the public a tidy view of the drops, both before and after taking, a double gallows had been built facing the Fair Grounds and high on top of the prison wall.

Before the early risers were abroad, hundreds of heavy farm carts and lumbering wains came creaking into town with their loads of merry, holiday-making country folk from far and near. Along the muddy roads came also bands of stinky farm lads, faring stoutly on foot, with stick in hand and bag on back, stepping down 30 miles or so to see the doings. Two men were to be killed by the law in the morning as an example to the public; and the schools throughout the district were closed that the children might benefit by so valuable a lesson in morals and good living. That day the taverns of Toronto did a stirring business.

"Your soul to the devil!" said young Jack to me. "Let us hooray down and see the necks stretched." The hangings had been set for ten o'clock in the morning; but an hour ahead of time there was a good-natured throng of thousands jostling one another before the grim prison walls. It was the sort of crowd one sees nowadays at a big country fair. Neighbors were greeting neighbors, and joshing over local affairs. Men carried their liquor well in those days; and, of course, mothers had brought the young children in their arms. What else could the poor dears do?

A stir among the men on the prison walls told us the death procession was coming. A hush of awed expectancy fell upon the great throng. And this gaping crowd, stirred with thoughts of human slaughter, was standing in the most humane and tolerant colony Europe ever established beyond the seas! New England had been developed by the labor of convicts transported to be sold as serfs on an auction block. We are often told of the Mayflower landing the Pilgrim Fathers on the Plymouth Rock. Oh yes! But we hear little of the fact that for a century every other merchant ship touching a New England port landed a cargo of convicts on the Pilgrim Fathers. The outposts of those colonies were pushed westward by rough frontiersmen who murdered as they went on frolics of their own. The southern colonies were developed by slave

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to go

The liver should pour out two pounds of liquid bile into your bowels daily. If the bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas builds up your stomach. You get constipated. Harmful poisons go into the body, and you feel sour, sunk and the world looks punk.

A mere bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get these two pounds of bile flowing freely and make you feel "up and up". Harmless and gentle, they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else. 25c.

labor, and the full wages of that slavery have not yet been paid. One of the first laws passed in Upper Canada in 1793, provided for the abolition of slavery; and in dealing with another human, there has never been a time or place in Canada, save in her wretched prisons, that any man could with impunity make his will a law to itself.

You ask what brought thousands of people together to see such a terrible sight as a double hanging; and I answer you that fifty thousand of the likes of you would turn out any morning to view a well-bungled hanging to-day. A murderer is a celebrity; and people run open mouthed to see a celebrity, to hear him speak and see him decorated—or hanged—as the case may be. Every crowd hungers for excitement and is looking for a thrill. Every mob is by nature cruel and blood-thirsty. With all his clothing and culture, man remains a savage, a fact that becomes obvious when a few of them run together.

The breath going out of thousands of throats made a low murmur as the murderer, William Turney, in his grave clothes and pinioned, came into public view and stoutly mounted the stairs of the scaffold platform. A priest walked beside him. Behind them strode a hangman, who was closely masked.

It was a matter of good form—and decently expected in those days—that a murderer make a speech and exhort the public. A lusty cheer went up as William Turney stepped smartly forward to make his speech from the gallows. His was an Irish brogue; and his voice was loud and clear.

"Die—like—a—man!" shouted loud-voiced Michael, the smuggler.

Turney had been working the fall before as a journeyman tailor at Markham Village. He dropped into a local store one dark night to get a jug of whiskey to take to an apple-paring bee. As the clerk, McPhillips, was bending over the liquor barrel, Turney stove the man's skull in with a hammer; and then rifled the till. He turned off the spigot, blew out the candles, closed the wooden shutters, and quietly went home to bed. The dead body was not found till the morning after. No one had seen Turney abroad the night before. He came under suspicion the next day because he rode to Toronto on a borrowed horse, and bought himself for cash money a pair of boots and a leather jacket. But that, you'll agree, was not hanging evidence.

Turney, however, needed money for his defence; and while lying in gaol at Toronto he got a letter smuggled out to his wife. The poor simple woman was no scholar; and she asked a neighbor to read it for her. The letter told her the sack of money was hidden under a loose board in the floor of their backhouse at Markham Village. He bade her get the money and give it to the lawyer man. So the damaging evidence leaked out. How much wiser to have let the solicitor's clerk visit the privy!

On the scaffold Turney made a rousing speech. He shouted to us that he had been a British soldier in his day, and was not afraid of death. Turney thanked us all kindly for the compliment of coming to his hanging. It was sorry he was for killing the poor man, McPhillips, who had never hurt him and had treated him as a friend. The crime, he told us, had not been planned, but was done on the spur of the moment. The devil had tempted him; and he fell. He had run home that dark night in a terrible fear. The wind in the trees sounded in his ears like the

HELP WARD OFF 'FLU THIS WAY

"Keep resistance high, organs clear and active, blood pure," say doctors

Don't let 'Flu get you down... beware of the epidemic that is raging! Keep on the job. Help avoid infection by keeping your system free from harmful wastes and poisons that accumulate and lower your resistance. Take Fruit-a-tives, the prescription of a famous Canadian doctor. Fruit-a-tives contain extracts of fruits and herbs and act to stimulate the liver to normal healthy action; activate the flow of bile, cleanse the intestinal tract of harmful wastes and poisons, tend to purify the blood stream of poisons and acids. Keep your system toned up to perfect health. It is your best insurance against 'Flu. Fruit-a-tives are on sale at all drug stores. Insist on genuine Fruit-a-tives.

groans of poor tortured souls in hell. Hanging, he told us, was what he deserved. Let it be a lesson to us all.

(To Be Continued)

Japanese Decorations

Only One Treasure Displayed At A Time In Homes

We are so familiar with Japanese objects d'art—porcelain, lacquer, kakemono, old armor, color prints, carved wood, ivory—that it might be imagined that the home of a wealthy Japanese family is a miniature museum of bric-a-brac, but this is far from being the case, writes a correspondent in the Weekly Irish Times.

There will be treasures, but they will be displayed one at a time each in its special place, while the remainder will live quietly in the "godown" out of sight, till the time comes to make a change.

Take, for instance, the carved ivory for which Japan is famous. The lady of the house may wear small carved pins in her hair—one or two, never more—and her husband may have on his tobacco pouch a small carved ivory netsuke, but you will look in vain about the house for a display, in a glass-case, of carved ivory images. Beautiful lacquer is seen on the table which is brought into the room at meal-times and afterwards removed. You may observe lacquer soup bowls in use during that meal, but you will only see them at such times, for the Japanese host and hostess consider it inappropriate to use these things as ornaments after they have served their definite purpose. The same applies to the beautiful Japanese porcelain.

In the livingroom on the dais of polished wood, called a tokomona, a feature of every Japanese house, you will find one beautiful picture, or kakemono, with one perfectly arranged vase of flowers, or a dwarf plum tree in a porcelain pot. From time to time, in accordance with the seasons of the year, the pictures are changed, and at least once a year the old suit of armor, or a beautifully proportioned piece of bronze, will stand alone on the tokomona.

The Japanese are artists in the use of space, and as a background think the almost empty room, natural colored, with a touch of black here and there, is most appropriate. Mats, made to fit, cover the floor. The wood-work is unstained, showing its natural grain, and kept fresh and clean by the maid who washes it daily.

Where the Occidental would have a fireplace, a gas stove or an electric heater, the Japanese has the habachi, or moveable firebox of glowing charcoal.

Imagine such a room—the arresting beauty of the one flower vase, the solitary kakemono in its appointed niche. It holds an atmosphere of unhurried peace and of true art.

Duke Of Windsor's Arms

Recorded At The Herald's College In Virtue Of A Royal Warrant

Arms for the Duke of Windsor have been recorded at the Herald's College in virtue of a Royal Warrant.

The Duke's Arms are those which he bore as King differed with a label of three points/argent, on the central point of which is an Imperial Crown proper. The Crest and Supporters have similar labels, and the Coronet is that of a Sovereign's son, which is different, in that it has no arch, from the Coronet which the Duke had as Prince of Wales.

This is the first time that Arms have been granted for a former sovereign, and in virtue of that the Imperial crown is used for the first time as a distinction on a label of difference.—London Times.

Saved His Pennies

Scoutmaster In Queensland Going To Jamboree In Holland

An odd purchase will be made at Brisbane, when Scoutmaster L. Whitford of Bundaberg, Queensland, will take 12,000 pennies to the shipping office to buy his ticket for a 12,000-mile journey to Holland. He decided two years ago that he wanted to attend this year's World Scout Jamboree in Holland, and started to save his fare. He saved all the English coins that came his way. Now he has four 19-pound jam tins full of pennies, besides £15 in English silver.

The landlady brought in a plateful of extremely thin slices of bread and butter, which rather dismayed her hungry boarders.

"Did you cut these, Mrs. Brown?" "Yes—I cut them!" came the stern reply.

"Oh," went on the boarder. "All right—I'll shuffle and deal."

The common domestic turkey can kill a rattlesnake. 2198

Comes As Complete Surprise

Fort William Man To Receive Insignia Of St. John Order

N. M. Patterson, shipowner of Fort William, Ont., who will be invested with the insignia of a Knight of Grace of the Order of St. John of Jerusalem at Buckingham palace May 25, expressed surprise at the honor to be conferred upon him when he arrived at Liverpool from Canada.

"I know little about first aid," Patterson said. "In fact I'm going to the London headquarters of the St. John's Hospital Brigade to see what it is all about. I've provided uniforms for the brigade in Canada and have been of some assistance but still the honor is a complete surprise."

An official of the hospital brigade explained Patterson was being modest and was being honored in recognition of his outstanding service on behalf of the order in Canada.

Demand For Stamps

Canada's First Public Stamp Auction Brings Many Buyers

Canada's first public stamp auction was held in Toronto recently when philatelists of 16 to 60 years of age paid more than \$500 for 200 lots of stamps.

When it was all over, the auctioneer, Robert Lindsay, 44-year-old war veteran, who turned a hobby into a business when the depression threw him out of work seven years ago, sat back and announced the auction "more successful than my wildest dream."

Canadian jubilee issues brought the best prices. One lot which in January could have been picked up for \$6.50, brought \$7.75.

Honey bees are not natives of the New World. Wild honey bees in America sprang from domesticated races imported from abroad.

Beggars In India

Number Of Diseased Mendicants Still Large In Calcutta

While Bombay, Lahore, Madras and the cities by constructive policy have gone a long way towards clearing their streets of the diseased mendicant, careful estimates show that over 4,000 beggars continue to infest the highways and byways and markets of India's commercial capital, of whom 1,000 are lepers, 400 blind and 600 sufferers from various other diseases and infirmities. It is this mass of miserable humanity that an effort must first be made to help.—Calcutta Statesman.

Pigeons tend two nests at the same time. They begin setting on another pair of eggs when one set of youngsters is only two days old.

Don't Let Foods Stale
Foods that ordinarily stale quickly will stay fresh and tempting a surprisingly long time if you cover them with Para-Sani Heavy Waxed Paper.
Your grocer, druggist or stationer has Para-Sani in the handy, sanitary knife-edged carton. For those who prefer a lighter paper put up in sheet form ask for Appleford's "Centre Pull" Packs.

PRAIRIE COUPLE OBSERVE 50th WEDDING ANNIVERSARY

On Wednesday, April 28th, the Golden wedding of Mr. and Mrs. Noland, Alberta pioneers from Tofield, now residing on Marshall road, was celebrated at the home of their daughter, Mrs. M. Urquhart. An invitation party thoroughly enjoyed the occasion, cards and music being the order of the evening. Congratulations were showered upon the happy couple by all present, which included Mr. and Mrs. Boluke, Mr. and Mrs. Trusler, Mr. and Mrs. T. Jackson, Mr. and Mrs. G. J. Busby, Mr. and Mrs. J. Wiens, Mr. and Mrs. I. E. Busby, Mrs. Hoon, Mrs. Urquhart, Mr. and Mrs. Noland, Miss M. Thorne, Messrs. R. Urquhart, 'Tek' Carsell and J. Moret. Lunch was served at midnight, the table being very attractively arranged and centered by a beautifully decorated wedding cake which bore the numerals 50.

Egg Prices To Rise, Says Expert

An improvement in the price of eggs is the forecast of Professor Lloyd, University of British Columbia. There is cause for optimism, Mr. Lloyd contends in the great reduction of poultry flocks in Quebec and Ontario. "In addition to this," he continued, "the higher prices for all classes of meats are bound to reflect favorably on the price of eggs before very long."

Do not be misguided by romantic stories of the Duke of Windsor's dire need for economy. Dependable estimates put his fortune at no less than \$3,750,000.

CARD OF THANKS

I wish to express my sincere appreciation for the care given my wife by Dr. McDiarmid and the M.-S.-A. nursing staff, during her recent illness.

Ratepayers Discuss Matters Of Interest to Abbotsford

Notwithstanding the extremely warm weather and the urge to stay outdoors, the attendance at the meeting of the Ratepayers' Association Monday evening, had every indication of the interest being sustained during the summer months. In addition to discussing business matters, it was suggested that features of a social nature be arranged to occupy a portion of the meeting period during the warm evenings.

The meeting was informed that in the light agreements with the B. C. Electric there is a clause which stipulates that the price for light in Abbotsford shall not be greater than that charged in other towns or municipalities. The poor conditions of street lighting was again under review, but no proof was advanced that the town is not getting as good a service from the light company as is being paid for. However there is a feeling that the lights in many places are not nearly so bright as they should be. It was agreed that the Town Commissioners be asked to check the voltage on power lines and to take whatever means necessary to see that proper strength of lights be maintained.

The matter of tree planting is left in abeyance. Due to the sudden hot spell, the meeting felt the time was not propitious for such undertakings. Members agreed it was of sufficient importance to keep in mind for late summer or early fall. There is some indication that the Commissioners will be prepared to encourage and assist in this work when the weather becomes more suitable.

Monday evening, Ratepayers' Association was informed of the generous offer of the Men's Club to offer its premises for meetings up to and including the month of September.

This organization is assisting with arrangements for the celebration in Abbotsford on Coronation Day—next Wednesday. Then there will be a program of events of particular interest to the children. The school management and teachers are also doing a great deal in making provisions for a day of real interest and enjoyment. A loud speaker system will be installed in the Jubilee Park, where the sports will be held, and it is expected that a portion of the Empire Coronation ceremony will be relayed to and heard on the grounds. This will include a brief address given by King George VI.

Announcement was made that there was every indication of the work initiated by the Board of Trade to have the road to the Hospital graded and hard-surfaced. The scheme as suggested by the Board of Trade calls for the work to be done by the town of Abbotsford and municipalities of Sumas and Matsqui. The Ratepayers' Association has since urged that this be undertaken just as soon as possible.

Reduce Varicose or Swollen Veins

This Safe Easy Way
Prove It At Small Cost
Swollen veins may become dangerous and sometimes break. Before resorting to operations or injections sufferers are advised to get an original bottle of Emerald Oil at George Black or any pharmacist and start to reduce the veins and bunches at once with this healing oil. A small bottle will last a long time because it is very concentrated and a little goes a very long way. Apply night and morning with a soft brush or finger tips as directed until the swelling is reduced. So effective is Emerald Oil that it is highly useful in reducing troublesome simple swelling due to strain and hastens their disappearance.

1929 Posthumous Testimonial of Matsqui Man Just Received

Matsqui friends, who remember the tragic death of Harvey Giffin, Matsqui garageman, who drowned in Cultus Lake, will read with interest the following letter just received by The News:

"The expression of sympathy for the loss of our son Ralph Harvey Giffin, who drowned in Cultus Lake, B.C., July 15, 1929, and the testimonial by his friends in B.C. to his upright Christian character, has, by some unaccountable means, only just now come into our hands.

"I, Harvey A. Giffin and my wife, Grace Giffin, express regret for the lateness of our acknowledgement of the prized testimonial referred to. I trust that this acknowledgement will come to the notice of all who attached their names to that expression of kindly interest in our son and in us."

HAROLD A. GIFFIN

Boston 19, Mass.

Dramatic Festival in Abbotsford Is Praiseworthy Event

Plans are nearing completion for the Musical and Dramatic Festival, to be held in the High School auditorium May 27th and 28th.

The preliminary trials are to take place this week under the supervision of the teachers of the M.-S.-A. area. Major L. Bullock-Webster, President of the B. C. Drama Association, will adjudicate the drama and the elocution; Miss Nancy Ferguson, Instructress in folk-dancing, Victoria, will adjudicate the folk-dancing; and Mr. Stanley Bulley will be the judge in the singing and pianoforte classes.

This festival is first of its kind to be held in this district, and it is hoped that it will stimulate the people of this district as have festivals in other sections stimulated the people to a greater interest in dramatic art.

Following is an abbreviated list of the requirements. A full list is available at the Education office.

Test Pieces for Pianoforte

Primary (under 10 years)—"Allegro Vivace" (Sonatine in C Major); Op. 55, No. 1; Kuhlau.

Junior (under 13 years)—"Mazurka"; Op. 7, No. 1; Chopin.

Intermediate (under 16 years)—"Scherzo"; Op. 16, No. 2; Mendelssohn.

Senior (under 19 years)—"Novellette in F"; Op. 21, No. 1; Schumann. Open—"Prelude in G. Minor"; Op. 23, No. 5; Rachmaninoff.

Test Pieces for Folk Dancing

Class I—(a) English Folk Dancing ("Black Nag", "Gathering Peacocks", "Ruffy Tufty"); (b) Scottish and European—own selections.

Class II—(a) English Folk Dancing: "Merry Merry Milkmaids", "Maze on a Cree"; (b) Scottish and European: Own selections from programme of studies.

Class III—(a) English Folk Dancing: ("Newcastle Old Mole"); (b) Scottish and European: own selections

Test Pieces for Songs

CHOIRS—
Grades I and II—(a): I had a Little Nut Tree"; (b): own choice.

Grades III and IV—(a): "There Stands a Little Man"; (b): own choice.

Grades V and VI—(a): "Golden Slumbers"; (b): own choice.

Grades VII and VIII—(a): "The Mountaineers"; (b): own choice.

High School Choirs—(a): "The Ash Grove (two parts); (b): own choice.

One-room Schools—(a): "A Hunting We Will Go";

VOCAL SOLOS—

Junior Girls (under 14 years)—(a): "Old Woman and Peddler"; (b): own choice.

Junior Boys (under 14 years)—"The Hedge Rose"; (b): own choice.

Girls (under 19 years)—(a): "I Love the Merry Sunshine"; (b): own choice.

One-Act Plays

"Not Quite Such a Goose"—1 mature woman, say 40 years; 2 girls in teens; 1 boy in teens. (Could be done by high school students.)

"Return of the Emigrant"—De La Roche. 2 women, 1 young girl.

"Christmas Chime"—2 men; 2 women. No Royalty.

"Two Crooks and a Lady"—Eugene Pillott. 3 males, 3 females. Royalty.

"He"—Eugene O'Neill. 8 males; 1 female. \$10 Royalty.

"She Was No Lady"—St. J. G. Ervine. 2 males; 2 females. Royalty.

"Today of All Days"—Philip Johnson. 2 males; 2 females. Royalty \$5.

"The Bishop's Candlesticks"—Norman McKinnel. 3 males, 2 females. Royalty \$5.

"Low Life"—Mazo de la Roche. 2 males, 1 female. No royalty if no admission charged.

"The Man in the Bowler Hat"—A. A. Milne. 4 males, 2 females. Royalty \$5.

Test Pieces for Elocution

A list of poems suitable for elocution, Grades 1 to 12, may be obtained at the Education Office.

LIBRARY NOTES

The 1937 Conference of the British Columbia Library Association will be held at Harrison Hot Springs on the last day of August. At a meeting of the executive committee held in Vancouver last Saturday, it was also decided to make the theme of this conference "Government Aid for Libraries." Delegates will attend from all parts of the province and there will be guests and speakers from outside. This should be a particularly valuable and interesting conference as it has been arranged in conjunction with the annual convention of the Pacific Northwest Library Association, which will be held at Harrison on the succeeding days, September 1st, 2nd and 3rd. The jurisdiction of this association comprises the northwestern states, from Montana to Oregon, as well as the Province of British Columbia, and the conference is an important annual event which will bring to the Fraser Valley this fall librarians and other people interested in library affairs from the largest libraries on this part of the continent.

The Community Newspaper

Few people appreciate in anything like full measure the tremendous influence for good exerted by the country weekly newspapers of the western provinces in the communities they serve and the quality of the service rendered by the proprietors and editors of these weekly symposiums of world, national and local current events.

Whether realized or not, however, the fact remains and can be irrefutably established that the well-conducted and discriminately edited country weekly—and that means the great majority of them—fulfils an extremely important function in the town and rural district in which it circulates. Nothing else that the subscriber purchases can be bought to yield such value for such a small monetary consideration.

And not only in quantity of material does the subscriber receive great value for an almost infinitesimal outlay but the quality of the merchandise offered to the purchaser of the paper is an unparalleled tribute to the discernment, ability and integrity of the proprietor who shapes its course and determines its policies.

An analysis of the contents of the average issue of the mill-run of country weeklies in the west demonstrates that considerable discernment is exercised in the selection of the news presented to their readers, that a high moral plane dictates the selection that is made and that service to the community of a high order is invariably maintained throughout their columns whether devoted to world events or to small local occurrences.

Partly because of this all-pervading tone permeating from the first paragraph to the last and partly because in many homes the local weekly is the sole printed purveyor of current topics no literature is more consistently and carefully read or with such close scrutiny, including the advertisements, than the country weekly newspaper.

Another factor which commends the country weekly to its readers and subscribers is the eminently sane outlook of its proprietor and editor in approaching the problems of the day—whether they be political, social, religious or economic. Their utterances invariably reflect a breadth of vision and spirit of tolerance so much needed in a world gone mad and at a time when too many turn aside to follow false gods or pursue spurious theories and "isms".

Then, too, much of the extraordinary influence exerted by the country weekly upon its readers should be attributed to the liberal space devoted to plans which have as their objective some phase of community betterment or improvement of the town and district. In this respect owners and editors give much of their time and energy to worthy causes for which there is no recompense other than the satisfaction which comes from having assisted in the promotion of a beneficial project.

Alongside the more imposing and voluminous metropolitan daily which is "sufficient unto the day" for its clientele, the country weekly paper may appear comparatively insignificant, but the latter is picked up, read and re-read and its entire contents of news, editorial content and advertising is digested and re-digested for a week until the succeeding issue steps into the breach. And it is largely because of this assiduous and intensive study and reflection which the weekly newspaper inspires that it wields such an important influence on its readers.

The country weekly also can be counted upon for loyalty to its readers, subscribers and advertisers, for justifiable pride in the town and district which it serves and in so doing is worthy of support, in season and out of season, from the local merchants, the local board of trade, the local sports organizations, the local churches and the people of the district, for the local paper is a co-operative enterprise, even though privately owned.

Without the services of a sound, sane country newspaper, any community is bound to suffer and many worthy local ventures would languish and wilt of inanition and without the whole-hearted support of the many individuals which make up the community the local paper would lapse into a decline and eventually inherit a lamentable grave.

The fact that the great majority of the country weeklies have survived the gruelling test of a depression of unprecedented length and excessive severity—and the casualties have been surprisingly few—speaks volumes for the high regard in which they are held, perhaps often unconsciously, by the people they have served, and are serving so well and so tenaciously, despite great handicaps.

Public Too Curious

People Barred From Parts Of Windsor Great Park

The decision, reluctantly arrived at, to close to the public parts of Windsor Great Park near the Royal Lodge to secure privacy for the King and Queen is a lesson to people who have been indiscreet in their curiosity, comments a writer in the London Daily Sketch. The ruling may be relaxed later if conditions improve. The King and Queen like to regard Royal Lodge and the Great Park as a part of their private lives.

For years there has been a standing reward of \$1,000 for one pound of manufactured comb-honey.

A bud has the remarkable power to reproduce every part of a tree; stem, foliage, branches and fruit.

HOW'S YOUR STOMACH?

YOU lose vital nerve force if you allow your stomach to distress you. Acid stomach, indigestion, gas or biliousness and "costiveness" cause the blood to be poisoned and will eventually destroy health and nerve force. This is what W. J. Fisher of 4 Sanford Ave., N. Hamilton, Ont., said: "I suffered with my stomach, could eat but very little and that would cause distress. I grew weaker daily and suffered from headaches. My weight went from 176 to 134 pounds. I took Dr. Pierce's Golden Medical Discovery and was soon able to eat normally. I gained in weight and strength and could resume my work. The 'Discovery' made a well person of me." Buy now!

Not New To Eskimos

Natives Of Remote Island Have Always Had Social Security

Social security is centuries old to the primitive Eskimos of remote Muniyak Island. They provide for their aged and needy through "gift festivals" a noted German scientist, Dr. Hans Himmelferber, disclosed after a five-months' study of the natives.

"All festivals are held mainly to exchange gifts, everyone making what he can to give away, even kayaks (skin boats) and 100-yard long seal nets, thus showing his value to the community.

"The gifts are piled up and then distributed by the most respected man, to the old and poor first. This provides an economic minimum for all members of the community, since many suffer undeservedly, being bodily incapable or unfortunate."

Bird nests are important export articles of the Malayan islands. More than 3,500,000 nests of the edible swift have been imported to China in one year, for conversion into birds' nest soup.

In the Samoan Islands, whole villages often pack up and go on excursion visits to other islands as far as 60 miles away. The trips often last six months.

Apparatus has been developed by New York state scientists for taking full-length X-ray pictures of men and women in color. 2198

Preservation Of Liberty

American-British Friendship Best Guarantee Of World Peace

Under the heading "hang together or hang alone," an editorial in the New York Daily News endorsed that part of Lord Tweedsmuir's recent speech at the United States naval academy in which the governor-general of Canada said:

"The American and British navies are united in the same purpose—the preservation of liberty and peace."

The News foresaw difficulties if an attempt were made to put a formal naval and military alliance between Britain and the United States through parliament or congress.

"We would hardly like to sew ourselves up in an agreement to help Britain fight Italy or Russia," it argued. "Britain wouldn't like to be tied up to us for some conceivable South American or Mexican war."

"But for the two of us to keep our informal friendship unflinching warm is only common sense... as long as we maintain the world's two most powerful navies, any nation will think a long time before picking a fight with either Britain or ourselves."

The editorial added that American-British friendship is not only natural, "but is also, as Lord Tweedsmuir says, the best guarantee of both nations' safety and the best insurance against another world war."

Mahatma Gandhi

Reported To Be Leading The Life Of A Typical Villager

Mahatma Gandhi is now leading the life of a typical villager.

He has taken permanent residence in a hut on the outskirts of Shegaon village, seven miles from Wardha (Central Provinces). His wife and secretary live at Wardha, hence the latter goes daily to his master. The road to Shegaon lies partly through fields which become a morass during the monsoon, making communication difficult.

Nearly a hundred huts, some thatched, are scattered about the village. Gandhi's home, which is a tiled hut of mud, has an airy hall in the centre which serves as his study. A kitchen, storeroom and bath complete the home. At the side is a small stable for goats.

Gandhi has no program for the future these days aside from his daily schedule. The villagers attend his open-air prayers at dawn and dusk.

Received Lloyd's Gold Medal

Admiral Evans Holds Rare Award For Gallantry At Sea

Admiral Sir E. R. G. R. Evans, who delivered his address as Lord Rector of Aberdeen University the other day, is the only man to have received one of Lloyd's gold medals for special gallantry at sea. He won it on the occasion of the Hong Moh disaster, when he dived into a heavy sea and swam with a life-line to the sinking vessel. Not content with that, he returned to bring an unconscious coolie to the small motor-launch, which had approached as near as possible. After that he dived in a third time to free the propeller from a piece of wire with which it had become entangled, reports the News of the World. He earned his famous title, "Evans of the Broke," when in charge of one of two destroyers which defeated six German destroyers off Dover in 1917.

Should Be Discouraged

British Royalty Thinks Official Presents Impose Needless Burden

King George intimated to foreign governments through official channels that he did not wish gifts on his coronation.

This follows the precedent set by his father, George V., who said shortly before the last coronation that outlays for lavish official presents were needless burdens on others and should be discouraged. Since then British royalty declined all gifts except those from personal friends.

Despite this precedent the British royal family and government still send magnificent gifts to other foreign rulers on state occasions.

Plants so shaded that they receive one one-hundredth of normal daylight grow little better than plants in total darkness.

HOW TO OVERCOME ITCHING PILES

If you are annoyed with itching piles or rectal soreness, do not neglect the same or run the risk of an operation. Any itching, soreness or painful passage of stool, is nature's warning and proper treatment should be secured at once. For this purpose get from any druggist, a package of Hemroid and use as directed. This formula, which is used internally, quickly relieves the itching and soreness and aids in healing the sore, tender spots. Hemroid is a physician's prescription and is highly recommended. It is easy to use and it seems the height of folly for anyone to risk an operation when a simple remedy which is so pleasant to use may be had at such a reasonable cost.

THE SHOW GOES ON!

OH, MOTHER... I'VE BEEN CHOSEN FOR THE LEADING PART IN OUR CLASS PLAY!

WELL, YOU CAN'T BE IN THE PLAY... AND THAT'S THAT!

WHAT ARE THEY TRYING TO DO GIVE HER AN EDUCATION OR MAKE A CHORUS GIRL OUT OF HER!

WHY CAN'T EDITH BE IN THE PLAY? I THINK IT WOULD BE GOOD FOR HER!

IT'S TOO MUCH TROUBLE TO MAKE HER COSTUMES—WHEN I'M HAVING SUCH HEADACHES AND INDIGESTION!

WHAT DOES HE CARE HOW HARD YOU WORK AS LONG AS THE KID HAS A GOOD TIME?

YOU'VE BEEN FEELING BADLY FOR MONTHS, DEAR! LET'S GO AND SEE THE DOCTOR! COME ON—LET'S GO RIGHT NOW!

WELL... I SUPPOSE IF I DON'T GO, I'LL NEVER HEAR THE END OF IT!

YOU'RE MAKING A BIG MISTAKE! DON'T LET HIM BULLY YOU!

MRS. BARCLAY, I BELIEVE THAT CAFFEINE-NERVES IS CAUSING YOUR TROUBLE.... I SUGGEST YOU GIVE UP TEA AND COFFEE FOR 30 DAYS AND DRINK POSTUM INSTEAD!

CURSES! IF SHE'S SWITCHING TO POSTUM I'LL HAVE TO SCRAM!

THERE'S BEEN A REMARKABLE CHANGE IN YOU, DEAR... YOU'RE GETTING MORE FUN OUT OF THIS PLAY THAN EDITH IS!

THAT'S BECAUSE I FEEL LIKE MY OLD SELF AGAIN... SINCE I SWITCHED TO POSTUM!

30 DAYS LATER

"IT SEEMS strange that tea and coffee could hurt me! I thought they were bad only for children!"

"Oh, no! Many adults, too, find that the caffeine in tea and coffee can upset nerves, cause indigestion or prevent sound sleep!"

If you suspect that tea and coffee disagree with you... try Postum for 30 days. Postum contains no caffeine. It is simply whole wheat and bran, roasted and slightly sweetened. It's easy to make... and costs less than half a cent a cup. It's delicious, too... and may prove a real help.

Try a can of Instant Postum. If at the end of 30 days you do not feel better, return the can and we will refund the price of the Instant Postum, plus the postage. Consumer Service Dept., General Foods Ltd., Cobourg, Ont. PS-37

SELECTED RECIPES

CRISP COOKIES

Temperature: 400 degrees F.
Time: 15 minutes.
2 squares unsweetened chocolate
1/2 cup shortening
1/2 cup sugar
1/4 cup "Crown Brand" Corn Syrup
2 eggs, unbeaten
1/4 cup flour
1/4 cup Benson's Corn Starch
1/2 teaspoon vanilla
1/2 cup finely chopped nuts
Method: Melt the chocolate in the top of a double boiler. Remove from heat and add the shortening, sugar, "Crown Brand" Corn Syrup, eggs, flour, Benson's Corn Starch and vanilla, beating the whole mixture thoroughly, being sure the eggs are added one at a time. Spread the mixture on baking sheets which have been oiled with Mazola. Sprinkle with nuts and bake in a hot oven. Cut while warm. These cookies are very crisp and easily made.

Use Of Serums

Taken From Persons Recovering From Infantile Paralysis Found Effective

The use of serum from persons recovering from infantile paralysis to treat other victims proved effective in checking an epidemic in Manitoba, Dr. F. W. Jackson, deputy minister of public health for Manitoba, told the conference of state and provincial health officers. "Altogether 539 cases were reported, of which 33 died and of the remainder only 99 had paralysis after the disease subsided. Six or seven only will be totally disabled," he said.

The Final Stop

You need 40 feet to stop your car at 20 miles an hour; 73 feet at 30 miles and 115 feet at 40 miles. At 50 miles you will need 166 feet—and if you keep on climbing in speed eventually you will need only "five or six feet"—depending upon your height. Moreover, then, you will be stopped for good.

"Is ink so very expensive, father?" "No, dear, what makes you think so?" "Well, mother seems quite disturbed because I spilled some on the hall carpet."

If each community used its own local sun time, a traveller going east or west would need to change his watch one minute every 13 miles.

A lightning flash lasts approximately one-millionth part of a second.

Russia expects to increase its oil production 18 per cent. this year.

A Seedless Pear

Fruit On Ohio Farm Is Also Practically Coreless

A new seedling pear, seedless and practically coreless, has been found growing on a Columbiana County, Ohio, farm. It resembles the Bartlett and compares favorably with that standard variety, ripening about ten days earlier. The tree promises to be vigorous and productive, and, while it has not yet been widely tested, it seems to have promise, especially for canning. For several years the fruits have averaged about 90 per cent. seedless.

Bicycles caused practically the same number of fatal accidents as privately owned automobiles in Great Britain in the last year.

To Mend Broken China

Mixture Of Isinglass And Vinegar Makes Excellent Fixative

An excellent china fixative can be made with isinglass which must be broken up into small pieces and placed in a small cup or egg cup, with a few drops of vinegar. The mixture should be of a syrupy consistency. Use a small camel-hair brush and paint the mixture on the previously cleaned edges, then press them tightly together. If possible, a thin rubber band will often be useful in keeping an article in position until the mixture has hardened sufficiently to hold.

The International Date Line, where each new day begins, has never been drawn by legal agreement.

Firestone
TIRES

Educational Needs Of Canada Different From That Of Great Britain

"The fine old fortifying classical curriculum of Oxford and Cambridge, to which he confessed he was sympathetic, has no place in Canadian legislation, Lord Tweedsmuir, governor-general, told the opening meeting of the 76th annual convention of the Ontario Educational Association at Toronto.

Addressing a gathering of hundreds of teachers, trustees, inspectors and administrators, the governor-general said he had not been in Canada long enough to know the peculiar educational problems here. Before his term expired he hoped to have "something useful" to say.

But he knew that the old idea of higher education, where a young man engaged in "humane learning" until he was 21 and after that acquired the particular technique needed for whatever profession he chose, could not apply in Canada.

"What we are concerned with in education is to enable youth of every class, including the poorest, to earn an honest living and at the same time to equip a boy for his life's work; to give him some background of education which will provide him with a wide perspective and a fund of utilitarian interests, and incidentally fit him to be a good citizen," Lord Tweedsmuir said.

That was the problem for educational authorities which must be faced with "common sense and a proper perception of realities." It was no good giving a boy a smattering of culture if he was going to starve; no good equipping him to earn a living and leaving his mind narrow and inflexible.

"I have been much cheered lately in visiting various technical and commercial schools in Ontario to find that an honest endeavor was made throughout the technical training to preserve an element of what I call the humanities," he said. "That is one aid to a solution.

"The other may be found in the way in which the technical training itself is conducted. If it is regarded not merely as the acquisition of a certain number of rules of thumb, but as a piece of serious mental training, then you are introducing the spirit of the humanities into the vocational side. You are producing not only technicians, but men and women with minds."

Canada's educational organization should be, from the nature of things, more elastic than that in Great Britain. Schools must be organized without pedantry and "with a due sense of realities. Authorities must be prepared to go beyond the schools.

The governor-general told the teachers their duties in large part were those of the pioneer. This had been brought strongly to him in visiting the drouth areas of the prairies where he found many teachers "on slender salaries, gallantly fulfilling their duties and sharing to the full in the discomforts of the depression."

"We praise, and readily praise, the fortitude of the prairie farmers; let us not forget the fortitude of the prairie teachers," he said. "As for your profession in general, I do not think it possible to exaggerate its value."

Attains Her Ambition

English Skating Champion Perfected Art In Ten Years

Miss Cecilia Colledge, who has won a world's skating championship at the age of 17, and who has been skating in Canada, is the daughter of a London West-end surgeon. Before 1928 she had never seen anyone skate, but after watching the British Women's Championship that year she decided on her life's ambition. Since then she has practised three or four hours almost every day, mostly on the London rinks during public hours, and when possible in Switzerland. In addition to her skating she is an accomplished dancer, swimmer and tennis player.

Rules Of Happiness

Asked for his rules of happiness in life, R. C. Smith, dean of Toronto advertising men, on his recent birthday, replied: "Do anything that's asked of you, and do it willingly! Strive to do your duty always, and give your clients the full benefit of your knowledge and experience."

The total number of railway passengers carried in England during last November was over one hundred millions. The iron horse is not by any means yet ready to rust on the scrap heap.

The tails of Russian squirrels are used to make camel's hair brushes.

Was Planned That Way

Blacksmith In Maine Built A Really Crooked House

The man of the nursery rhyme who walked a crooked mile and lived with a crooked cat in a little crooked house, undoubtedly hailed from the sedate, Colonial town of Alfred in York County, Maine. The crooked house is there for all to see, in proof of this assertion.

It is undeniably crooked. It always has been crooked, from the day the last shingle was nailed on its crooked roof. Eliphalet Coffin built it that way, and generations of Alfred folk have never called it anything but "the crooked house."

The roof tree and the eaves of the structure, which was built soon after the Revolutionary War on the narrow road that skirts Shaker Pond on the west, have a jog that sets the building in a shallow arc.

Some say that Coffin built it that way to make it conform to the crook in the road, and others offer as an explanation that he was only carrying out some of his whimsical notions of what constituted beauty.

Coffin was the town blacksmith and had a leaning to the artistic. Many specimens of his hand-wrought ironmongery still adorn Alfred houses, among them the unique bow and arrow pattern placed at intervals on the top of the two-story verandah on the John Holmes house, which was built in 1802. They were ordered by Senator Holmes to show his friendliness toward the redmen of Massabesic.

There are plenty of other memorials of Eliphalet Coffin in the shape of scrapers, hinges and latches, highly treasured by their owners.

Inspection Is Thorough

More Canadian Bacon Is Going To Markets In Britain

Exports of Canadian bacon to Great Britain have increased considerably in past years. In 1933 they totaled 71,524,700 pounds, in 1934 they rose to \$119,707,600 pounds and in 1935 to 124,327,900 pounds. In 1936 shipments to the British market amounted to 147,688,800 pounds valued at \$25,138,590.

Great care is being taken by Canada to maintain the high quality of her bacon exports to the British market and to assure a continuity of supplies. All packing plants must be licensed to export Wiltshire bacon. The bacon is graded and stamped "Canada" together with the grades A, B, or C. On arrival in England each shipment undergoes an additional inspection by a Canadian Government inspector. Each Canadian packing house is required to estimate the amount of bacon it plans to ship each month of the year. This system is designed to keep the shipments within a five per cent. variation in the quantity from week to week in order to prevent wide fluctuations in the supplies going forward.

Rides A Motorcycle

Goderich Man, 79 Years Old, Creates Something Of A Record

Walter R. Henry lives in Goderich. In all he has been living there and elsewhere for 79 years. That is not unusual because others have done the same thing. But Walter R. Henry rides a motorcycle. Nor did he start at it years and years ago. He admits he was 72 years old when he tried to make one of those things go, and before that he used to ride on a bicycle. When he got tired making that go with his feet and legs he turned to the motorcycle.

Walter R. Henry, the 79-year-old motorcyclist of Goderich, says that the new speed law of 50 miles an hour will suit him. When he gets out in the open he likes to sift along at an even 45 miles.

This paper is always looking here and there for something which looks like a record, and Walter R. Henry of Goderich, 79 years of age, chugging along on a motorcycle, may supply material for one.—Peterborough Examiner.

Speaks For Itself

It looks like an ordinary cigarette box and it is an ordinary cigarette box, but as you open the lid, the box actually speaks and you hear a voice ask, "Will you have a cigarette?" This is without doubt the most fascinating and intriguing novelty of the century.

With his ferrets, Keeper A. Hopper of the London zoo has caught 8,500 rats in 12 years. 2198

Courtesy At Sea

Ships Of Every Nationality Will Help Each Other

Many motorists have had the experience of having had a breakdown or an accident on the highway and car after car has gone by them, passing within a few feet, without stopping to ask if any help could be given.

A few weeks ago an American freighter was in danger of sinking in the Pacific, 840 miles from the nearest port. In response to a wireless call for help a British steamer pushed 250 miles as fast as she could in order to render assistance. A Scottish trawler was in danger of sinking off the Orkney Islands. To her call for help a German trawler responded, several of the crew rowed to the doomed vessel through tremendous seas and took the crew off. Time and again ships will put on such a head of steam as will strain the boilers in order to rush to the aid of shipmates in trouble. Even great Atlantic liners, to whom every hour is precious in time and money, will go long ways off their courses to succor some little craft. It does not matter what the size or nationality of the unfortunate ship is. Britisher will help German; German will help British; Italian will help Greek; American will help Russian. It is the code of the sea, the greatest fraternity in the world.

At sea a defeated liner will dip her colors to the new holder of the "blue ribbon." In port the officers will visit each other; the crews will fraternize in the waterfront saloons and swap yarns.

But when you have a breakdown on the highway—!—St. Thomas Times Journal.

Urges Fixed Easter Date

Toronto Minister Has Suggested Third Sunday In April

"Why not set Easter for the third Sunday in April, and follow it with a public holiday on Monday?" asked Rev. Dr. C. A. Williams at Howard Park United church, Toronto, pointing out that it was difficult to get the Easter spirit when it came so early in the year with snow on the ground and a raw wind blowing from the north.

"The present arrangement of jumping all over the calendar is bad for church and school, for trade and travel. It frequently spoils what ought to be the happiest season of the Christian year," said Dr. Williams.

"We talk a lot about the Christmas spirit," Dr. Williams added. "Why then do we think so little about the Easter spirit?"

Safety In The Air

Proportion Of Accidents Small Compared To Passengers Carried

Of the 200,000 passengers carried by British air companies last year in Britain and overseas, only 12 were killed—one passenger in every 16,666. Statistics for foreign air lines are scarcely less impressive. Day by day, across the Old World and the New, across inaccessible mountain ranges, arid desert tracts, and wide oceans, the machines hum on their normally uneventful paths. Contemplation of the millions of miles safely traversed (Imperial Airways alone expect to cover 8,000,000 miles this year) helps to keep a sense of proportion in the face of such occasional disaster as attends all human progress.—London Daily Mail.

Lag In Production

Russian Government Discloses An Alarming Condition In Farm Operations

The Russian Government disclosed an alarming industrial and agricultural lag for the first quarter of 1937 in its program designed to force production even beyond the point fixed by the second five-year plan.

The backwardness of the Spring planting campaign—almost 315,000,000 acres behind schedule—alarmed the Government, and raised fears the plan, which ends this year, would not be completed on the scale designed as a celebration of the first 20 years of Soviet rule.

Planting for 1937 at the end of March should have reached a total of 328,000,000 acres, but a survey of the U.S.S.R. showed only 13,200,000 acres have been planted. In the corresponding period last year 54,408,000 acres had been sown.

Farmers claimed the cause lay in the backwardness of Spring but officials charged it was due to lack of preparation and carelessness, and was rapidly growing into a dangerous situation because of the shortness of the growing season in vital agricultural belts.

Wonderful New Organ

One Of Recent Features Added To Paris Opera House

A "light" organ on a vast semi-circular panorama 85 feet high and 20 tons in weight is one of the many wonderful new features of the Paris Opera House, reopened recently in the presence of the president, M. Lebrun.

The opera house, which is still one of the largest and most luxurious places of entertainment in the whole world, has been entirely renovated and largely reconstructed since it was closed after the fire last September.

The huge panorama which has been installed is made of steel, covered with asbestos and sheets of mica, and will reflect the sound into the auditorium without causing an echo. Divided into two parts, the panorama can be hoisted up rapidly by an electric crane.

All lighting effects will be automatically controlled by an electrician with a special observation post opposite the prompter.

Here he will be able to order the sun to set and cause soft moonlight to flood the "sky" behind the stage, which is so large that a moderate-sized theatre could be placed upon it.

Using Roller Skates

Employees Of Tire Corporation Give Customers Snappy Service

Somewhat lost on 100,000 square feet of floor space in new and larger quarters, 18 employees of the Canadian Tire Corporation in Toronto have solved the problem of providing snappy customer-service by wearing roller skates. Alfred Stevens, 200-pound manager, conceded that he and a few others had provided customer-laugh as well by falling. But the experiment was such a success that 18 pairs of skates were ordered. They are the type used in roller-skating rinks.

Cobwebs are made by a tiny spider, but because it seldom is observed at work, many people believe the webs to be formed only of dust and lint. "Cob" is an old English word meaning spider.

Initials Have Never Been Smarter!

Household Arts by Alice Brooks

Linens and Dainty Accessories Easily Mastered This Way

PATTERN 5782

Initials have never been smarter! And one asks no smarter initials than these which take form quickly by simply embroidering a few single stitch flowers and French knots! Make blouses and hankies bespeak your ownership with a two or three-letter monogram, while various household linens may be just as personally marked this easy way. A single color, two shades of a color, or black with a color are all smart. In pattern 5782 you will find a transfer pattern of five complete alphabets, two 2-inch, two 1½ inch and one ¾ inch; information on the correct placing of initials for monograms; illustrations of all stitches used.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

Eminent Meteorologist Says The Climate Of Canada Is Gradually Growing Warmer

Science Saves Fruit

X-Ray Being Used To Detect Flaws In Oranges

Examination by X-ray is practiced by California fruit growers to detect flaws in oranges. At East Pasadena the first machine built for this use has produced satisfactory results. The oranges are carried over a 100,000-volt X-ray tube by a conveyor belt on either side of which are windowed boxes inclined at 45 degrees. Testers peering through the windows see silhouettes of the passing oranges on a fluoroscopic screen. The sound, juicy oranges appear dark; those that are unripe, sour, frozen or granulated appear light and are thrown off the belt when the tester moves a handle. The lead used in the machine to protect the testers from the effects of X-rays brings its weight to a ton.

Last summer the research divisions of the Department of Agriculture conducted investigations to find out why some tomatoes decay faster than others and how grapefruit can be kept fresh longer while awaiting sale on the stands. It was found that the fungus which produces the decay of tomatoes after the fruit is harvested develops rapidly at temperatures ranging from 75 to 85 degrees Fahrenheit. This is held by the Bureau of Plant Industry to explain why so many commercial tomatoes harvested and shipped green without refrigeration decay. As to the grapefruit, it is recommended that the fruit be pulled instead of clipped from the tree and immersed immediately in an eight per cent. solution of borax. The cost of this treatment is only about one-half a cent for each 100 pounds of fruit, and the loss is reduced by two-thirds.—New York Sun.

Blood Transfusion Institutes

Have Been Set Up In Spain By Loyalist Government

Powerful weapons for "the next war" are being perfected on the battlefields of Spain, a "testing ground" closely watched by military experts of all nations.

While military men are thinking up new ways to kill, army surgeons are keeping abreast of them in the matter of saving life. One of the most outstanding, and least-heard-of, development of the Spanish civil war is the blood transfusion institutes set up by the loyalist Government.

Under the direction of Dr. Norman Bethune, Montreal surgeon, the Madrid institute has put the wartime blood donating on a mass production basis. Already Dr. Bethune has found it possible to conserve human blood for two weeks and the loyalists have developed a system of refrigerated army trucks for rushing bottled blood direct to the battlefield for transfusions in the front lines.

In the last three months, in Madrid alone, more than 45 gallons of blood have been donated by persons whose names are on a list of 2,000 donors, and 193 transfusions made. This is being duplicated at other strategic spots in loyalist Spain, providing much research materials for hospitals in time of peace.

Determines Age Of Ocean

Professor Figures On Yearly Outflow Of Salt From Rivers

Every year the rivers of the world discharge about 2,316,000,000 tons of salt into the sea. The water evaporates and leaves the salt there to gather another load, the ocean thereby becoming increasingly salty. If the amount of salt in the ocean can be determined, it should be possible to ascertain how old it is.

Dr. Lawrence Irving, Professor of Experimental Biology at the University of Toronto, has made these calculations. The ocean is so uniform in its composition that a sample taken anywhere except at the mouth of a river will give an accurate analysis of the entire sea. On the basis of such figures, Dr. Irving denotes 70,000,000 years as the approximate age of the ocean.

Scored Anyway

A good story about Sir Thomas Beecham is told in a recent issue of the Daily Sketch. When a Continental impresario objected to "Figaro" being conducted without a score, amendment was promised, and next time the score was on the desk. "Excellent, and much improved by the score," was the verdict. "Thanks," said Sir Thomas, "but that score was 'Parsifal' upside down. So you see I score anyway."

It will be pleasant news to those who don't like long periods of sub-zero temperature to learn that Canada's climate is continually growing warmer. This information comes from no amateur or optimistic prophet but from one of the world's most eminent meteorologists—Dr. Moses B. Cotsworth, of Vancouver and London.

In No. 7 of his well-known scientific booklets, prepared at the request of the British Association of Science, Dr. Cotsworth has much to say on this subject. The booklet, entitled "Geology's Interest Hinges on Climate Changes", is a brilliant summary with numerous graphs, charts and maps. Dr. Cotsworth's contention is that creation is continuous. This continuity is evidenced by climatic changes and evolution which, mainly through the ever-continuous glacial period, have variably formed, rested and renewed the surface of the earth in most countries and latitudes.

Dr. Cotsworth shows that varying winds, retreat of glaciers, Polar currents, earth transformations, trends of ocean currents and other agencies mainly are responsible for changes of climate. It is interesting to note, from information gathered over 13 years, that the recession of the main Alaskan glaciers continues, bringing a warmer climate to that country and to the whole of North and Western Canada. This recession is extending down the Canadian and United States Rocky Mountains, and combined with it are definitely will be many hundreds, probably warmer winds and sea currents. It thousands, of years before Canada might enjoy a semi-tropical climate, like Bermuda, but it will be a comparatively limited period before we have an all-year climate not much colder than Northern Scotland, he says.

There is much useful information in this booklet, mainly published to increase the teaching of geology in the schools. It treats of changes in earth surface, of reptiles, mammals, and man, the age of the first being placed at 40,000,000 years and the last at 1,000,000. From the start of the cooling of the earth some 155,000,000 years ago, the sleeping giant of pre-history is revived as well as the outstanding events of its majestic life history during the long geologic ages. On this is based the argument that climate is a matter of continuous change.—Ottawa Journal.

Has Far-Reaching Effect

British People Find Rearmament Increases Cost Of Living

There does not seem at first sight to be any connection between guns, ships, explosives and the cost of living but there is. British people are finding that not only have they to pay heavily for rearmament but they have to pay more for their ordinary requirements.

The price of steel is to go up on May 31 by agreement with the Government, and this is going to increase the cost of automobiles, steel for housing and other constructional works. Therefore, the cost of cars, home rents and of new houses will go up.

Enormous quantities of textiles are being bought for uniforms, army blankets, etc., with the result that wool has gone up 40 per cent. to fill orders not only for Britain but all countries now embarked on rearmament programs. The result is the public is having to pay more for suits, overcoats, underwear, shirts and blankets.—St. Thomas Times-Journal.

Taken For Granted

A certain judge attended a function and left his hat and coat in the cloakroom. The attendant, who knew him by sight, did not give him a ticket.

When the judge left he was given his correct belongings.

"You did not give me a ticket when I came in," he said, "so how do you know these things belong to me?"

"I don't," replied the attendant. "I only know that you handed them to me."

"Mother, does an apple a day keep the doctor away?"

"Well, yes, dear, I have heard it said. But why?"

"Well, I think you had better give me one, as I've just broken the doctor's window."

The machine age hasn't eliminated all exercise. You still have to remove the cellophane.

Coronation SALE!

Friday, May 7--Sat'day, May 15

MEN'S DRESS SHIRTS
A good shirt at a big saving; in green, blue, fawn, checks and white

ABBOTSFORD LOSE 7-1 IN FERGUSON SOCCER CUP FINAL

Abbotsford soccer team made an inglorious final in their last game of the season in the G. V. A. A. soccer league, when they were trounced, 7 goals to 1, by Hammonds, a team they have previously beaten twice and tied once in three encounters.

We won't bother going into the gory details. The fact that the score was only 2-0 at half time will show the game was not so one-sided as the score indicates.

Football fans will have opportunity to see two first-class teams in action at the Jubilee grounds within the next week. This Sunday, Abbotsford meet the Chinese Students, a colorful aggregation who play in the Vancouver Mid-week League. The visitors play a keen game and are a good team to see. On Coronation Day, the locals meet a fairly strong team from the city—Twigg Island Dairy. The visitors are a peppy bunch, and have made a name for themselves in the city by their fighting spirit.

Jubilee grounds are this week being put into shape for sport and the coming celebrations. The grass will be cut and the entire field thoroughly gone over with a five-ton roller.

Cribsters Enjoy Annual Banquet
Over sixty members of the local cribbage league wound up the season with a sumptuous banquet in the hall of the Trinity United church last Thursday evening. The ladies' aid of the church was in attendance and kept the tables loaded with delicacies. L. J. Kettle of Poplar acted as chairman, and presented the scroll to the Abbotsford Ladies "A" team, who topped the league. A presentation was made to Mrs. W. Crossley, an active member of the cribbage league, who has left the district.

GILMORE—CALVERT
Attended by a large number of Abbotsford friends, the wedding of Miss Jean Calvert, eldest daughter of Mr. and Mrs. J. Calvert of Abbotsford, to Mr. Harry Gilmore, took place at the Steveston United church last Friday evening. Rev. Dean Pastor performed the ceremony.

The bride, who was given away by her father, wore a white satin wedding dress and white net. Her sister wore a yellow satin dress. A little flower girl, Barbara Shorey, wore rose silk.

Following the ceremony, a supper was served at the home of Mrs. G. Shorey. Later, dancing was enjoyed.

After a honeymoon spent in Seattle the young couple will make their home in Steveston.

SAVE MONEY ON YOUR Fly Spray

Keep your cows free from flies and get maximum production from them. Use Watkins Fly Spray which kills and repels. In addition, it is clean and will not discolor or gum up the hair of your stock nor will it burn the hide or cause discomfort as heavy oil sprays do. It will not taint milk. You can use it before milking and in the milk house. Watkins Fly Spray is cheaper because it goes further.

MORE FOR YOUR MONEY
Watkins new Improved Fly Spray now gives higher kill and a knock-down three times faster than before. It repels flies and mosquitoes longer. Yet get more for your money because you use less.

I am taking orders now for summer delivery. Wait for my call and I will show you how to save money.
